Wednesday 30 October 2018

REFRACTORIES FOR THE GLASS INDUSTRY (2 day course)

Module No. R6

Thursday 31 October &
Friday 1 November 2018

*Dates refer to modules held at
Lucideon UK headquarters.*

Who is the course for?

Designers, installers, process leaders, production and manufacturing operatives, maintenance teams, purchasing teams, material scientists or chemical and process engineers, project managers, R&D, quality and laboratory technicians, technical teams, refractory and equipment manufacturers, installers, suppliers, distributors and contractors.

Course details

Designed to be interactive, our tutor will draw upon his decades of experience to provide attendees with the theory and practices that can be applied to the everyday challenges faced by anyone involved with refractories.

The training can be provided to meet your specific business requirements:

- Modules delivered at our Stoke-on-Trent, UK, headquarters
- Customized training at your site

Our experts will share their knowledge, skills and experience with your teams whatever their business function, from technical and manufacturing through to processing, marketing and sales. Please contact us to discuss your requirements.

Course materials

Training materials are provided for each module. Attendees will also have the opportunity to discuss any technical challenges they may currently be facing.

Course tutor

JAN THERON *Refractory Specialist*

Jan has over 20 years of industry experience and is the current president of the Institute of Refractories Engineers.
