

CERAMIC WHITEWARES TRAINING

TRAINING FOR CERAMIC MANUFACTURERS, RETAILERS & RAW MATERIALS SUPPLIERS

We offer an extended range of ceramic whitewares training courses for tableware, tile and sanitaryware manufacturers, as well as retailers and suppliers.

Thanks to our decades of experience in the whitewares sector and our internationally recognized expertise in ceramics, we have developed training courses that are suitable for multiple teams in your business, from technical and manufacturing through to processing, marketing and sales.

Training can be selected from set modules or tailored to meet individual business requirements.

The set modules cover every part of the manufacturing process, including Materials Selection, Casting, Firing Pressure Casting, Plaster Moulds and Glazes, to name a few.

Visit www.lucideon.com/whitewares-training to view the full range.

Our interactive and engaging training sessions are available at the Lucideon HQ, onsite or as webinars.

At the Lucideon HQ, training is delivered in a classroom setting alongside other industry attendees. The courses include a combination of theoretical and practical learning sessions and networking.

The webinars and onsite training enable you to minimise your downtime and maximise learning. Our onsite training also provides the opportunity for on the job learning and support for factory issues.

And, if your training needs are company specific, we can also work with you to develop the relevant course content, learning aims and objectives.

To discuss your requirements in more detail, contact Caroline Mullington, Technology Partnership Manager:
